Phlebotomy
2026-2027

Short Course Description:	This course provides a review of the Phlebotomy Technician in the laboratory. The Laboratory relies on the phlebotomy technician to collect quality samples from the patient to produce quality laboratory results. To do this, a phlebotomy student must create an atmosphere of trust and confidence with patients while drawing blood specimens in a skillful, safe and reliable manner. Practical instruction provides hands-on training in venipuncture technique with procedures verified through a skills check-off system. The course includes 112 combined hours of classroom/lab training and an 8-hour clinical to provide a complete learning experience. Upon successful completion of the program the student will then become eligible to sit for the national exam to become a National Certified Phlebotomy Technician.
Certifications Offered:	MedCA and Certified Phlebotomy Technician (CPT)
Start Date:	Monthly start dates
End Date:	Varies by class
Hours/Days:	Monday – Thursday, 8:00 am – 2:00 pm
Program Hours:	120
Instructional Weeks:	Approx. 6
Total Program Cost:	$1750
